Our whole range

Sustainable workplaces

Sustainability at workplaces is about creating an environment that supports both people and the planet. From an environmental perspective, this involves establishing effective systems for waste management and recycling. With growing focus on sustainability and changing laws around waste handling, it is more important than ever to have the right solutions in place.

How do we work with waste management?

When we talk about sustainable workplaces and environmental responsibility in relation to our product range, we refer to smart waste management. This has always been a fundamental part of what we offer – and it continues to evolve and grow in line with market demand. Our focus is to create complete workstations, especially for industrial and logistics workplaces, where waste management and recycling play a key role. In this brochure, we highlight two important areas within waste management: recycling solutions and waste bins designed for different environments. Here, you will find a selection of our products aimed at inspiring a sustainable approach to the workplaces of the future. Explore our full range at wfi.se.

RECYCLING

INDUSTRIES

Recycling for industries

As the demand for sorting different types of waste increases, smart and practical recycling solutions are becoming more and more essential. And perhaps not only in the form of fixed installations but also as more flexible designs. Basically, the goal is to make recycling easier. This is often best achieved through clear labeling of containers and by increasing the number of bins available at the workplace.

We have a carefully selected range of recycling products tailored for industrial environments, with both fixed and flexible solutions. For example, our waste bins with coloured lids and symbols make it easy to sort many different types of waste and create your own recycling station. For more flexible needs, we offer recycling trolleys equipped with wheels and movable recycling markers – a practical solution for easy sorting, handling, and emptying throughout the workday.

RECYCLING

5-666-01

Recycling trolley complete 1

Robust recycling trolley for industrial waste management. Equipped with six large containers with a volume of 50 liters each.

HEIGHT: 876 mm**DEPTH:** 1182 mm**WIDTH:** 570 mm**LOAD CAPACITY:** 200 kg**ACCESSORY:** Recycling marker complete 5-666-0

5-666-02

Recycling trolley complete 2

Robust recycling trolley for industrial waste management. Equipped with four large containers with a volume of 50 liters and four drawers with a volume of 20 liters.

HEIGHT: 876 mm**DEPTH:** 1182 mm**WIDTH:** 570 mm**LOAD CAPACITY:** 200 kg**ACCESSORY:** Recycling marker complete 5-666-0

TILTING SKIPS

Recycling with tilting skips

In addition to our waste bins and recycling trolleys adapted for industries, we also offer simpler solutions to support effective sorting. With our recycling markers in sheet metal, you can easily label your tilting containers for different materials – sustainable, simple, and stylish. The markers come in seven colours and are designed to hang on the edge of the container, held in place by a magnet. A clever solution that makes sorting and handling different types of waste both easier and more efficient.

RECYCLING

2-929-3-105 etc.

Recycling marker sheet metal

Recycling marker in sheet metal for labeling tilting containers. The marker is easily hung on the edge of the tilting container and held in place with a magnet, can also be permanently attached.

MATERIAL: Sheet metal**COLOUR:** Yellow, orange, red, green, white, black, grey**QUANTITY/PACKAGE:** 3

RECYCLING

PUBLIC ENVIRONMENTS

Recycling for public environments

If you are furnishing a locker room, cloakroom, or office, we offer a selection of waste bins tailored for recycling in public environments. This product line includes bins with three different lid options for sorting paper, bottles, and combustible waste, that can be chosen with legs, foot, wheels, or wall mount. In addition to the simple variants, there is also a triple that has all three different lids for recycling. All of these waste bins are available in black, grey, and white, but can also be lacquered in any colour on request. A product series designed to combine function with a clean and modern look in any workspace.

13510-003-196 etc.

Waste bin floor

Waste bin placed on legs or a foot. Equipped with an inner ring insert for easy placement and handling of waste bags inside the bin.

VOLUME: 30 liters

MATERIAL: Sheet metal

COLOUR: Grey, black, or white

LIDS: Bottles, paper, combustible waste

13510-007-196 etc.

Waste bin wheels/wall

Waste bin placed on wheels or a wall mount. Equipped with an inner ring insert for easy placement and handling of waste bags inside the bin.

VOLUME: 30 liters

MATERIAL: Sheet metal

COLOUR: Grey, black, or white

LIDS: Bottles, paper, combustible waste

WASTE BINS

Waste bins

To complement our solutions designed specifically for recycling, we also offer a wide range of general waste bins and containers. Here we return to the core idea that there should be waste bins easily accessible in different places, and perhaps in more places than there are today. By adding waste containers in strategic locations, we make it easier for our employees and create better conditions for waste to be disposed in the right place.

For example, to streamline waste management at a workstation, we have three different waste bins that are mounted directly on the workbench – one that is hung on the back, one that is mounted below the table top, and one that is hung on the side. With these products, we have all the possibilities to take care of the waste while the work is being done, without having to leave the workstation. For even better accessibility, we recommend combining these with larger bins placed throughout the rest of the workplace. Better accessibility for better management.

HINGED LID
WITH HANDLE

FOOT PEDAL
FOR OPENING

2-470-0 etc.

Refuse bin with pedal

Cylindrical refuse bin made of hot-dip galvanized sheet metal. Foot pedal for hygienic lid opening.

VOLUME: 30 or 70 liters

MATERIAL: Galvanized sheet metal

COLOUR: Galvanized, black, red, blue

2-474-0 etc.

Refuse bin with handles

Cylindrical refuse bin made of hot-dip galvanized sheet metal. Hinged lid with handle for easy emptying.

VOLUME: 115 liters

MATERIAL: Galvanized sheet metal

COLOUR: Galvanized, black, red

2-475-0 etc.

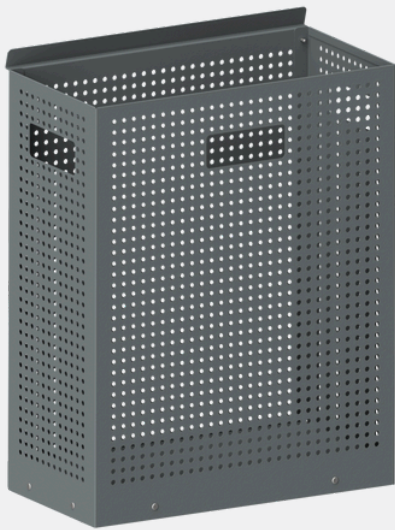

Refuse bin with handles

Cylindrical refuse bin made of hot-dip galvanized sheet metal. Hinged lid with handle for easy emptying.

VOLUME: 160 liters

MATERIAL: Galvanized sheet metal

COLOUR: Galvanized, black, red

2-485-136

Waste bin for frame

Functional waste bin designed to be placed behind the workbench. Allows you to easily slide trash and waste over the table top directly into the bin.

WIDTH: 400 mm
DEPTH: 200 mm
HEIGHT: 500 mm
MATERIAL: Sheet metal
VOLUME: 40 liters

2-486-136

Pull-out waste bin

Pull-out waste bin designed for mounting under the table top of a workbench. Fully extendable for easy handling and emptying of the bin.

WIDTH: 335 mm
DEPTH: 480 mm
HEIGHT: 380 mm
MATERIAL: Sheet metal and plastic
VOLUME: 25 liters

2-487-136

Waste bin for side mounting

Simple and practical waste bin for mounting at the front or side of the workbench. Has a steel handle and can be complemented with a lid.

WIDTH: 260 mm
DEPTH: 185 mm
HEIGHT: 310 mm
MATERIAL: Plastic
VOLUME: 12 liters
